

Solution Requirements

Date	5 July 2026
Team ID	XXXXXX
Project Name	Smart Lender
Maximum Marks	4 Marks

Define Functional and Non-Functional Requirements:

Create a comprehensive list of requirements to define exactly what your solution will do and how well it will perform.

- **Functional Requirements (FR)** define specific behaviors, functions, or features of the system (What the system should *do*).
- **Non-Functional Requirements (NFR)** specify the criteria that judge the operation of a system, rather than specific behaviors (How the system should *be*).

Fill out the descriptions and necessary details for each category provided below.

Step 1: Functional Requirements (FR)

S.No	Requirement Category	Requirement Description	Priority (High/Medium/Low)
1	Authentication	Users log in securely using email/mobile number and password with OTP verification.	High
2	Authorization levels	Admin, Loan Officer, and Loan Applicant have different access permissions based on their roles.	High
3	External interfaces	Integrates with Aadhaar/PAN verification, credit score services, SMS/Email gateway, and payment/banking APIs.	High

4	Transactions processing	Processes loan applications, verifies documents, performs ML-based fraud detection, and updates loan status.	Medium
5	Reporting	Generates loan application reports, fraud detection reports, approval/rejection reports, and dashboard analytics.	High
6	Business rules, etc.	Loan approval depends on eligibility, credit score, income, document verification, and fraud risk score.	High
7	Compliance to laws or regulations	Complies with data privacy regulations and banking security standards to protect customer information.	High
8	<i>Other</i>	Sends real-time SMS/Email notifications for application status, approval, rejection, and document requests.	Medium

Step 2: Non-Functional Requirements (NFR)

S.No	NFR Category	Requirement Description	Target Metric / Acceptance Criteria
1	Performance & Speed	System should process user requests quickly.	Page loads in < 2 seconds

2	Scalability	System should support increasing users and loan applications.	Supports 10,000+ concurrent users
3	Security & Data Privacy	Encrypt user data and prevent unauthorized access.	AES-256 encryption, secure authentication, and role-based access control
4	Reliability & Availability	System should remain available with minimal downtime.	99.9% uptime
5	Usability & Accessibility	Provide a simple, user-friendly interface accessible on mobile and desktop.	Easy navigation and responsive design
6	Other	Maintainable and easy to upgrade with new ML models and banking features.	Easy navigation and responsive design
