

Problem-Solution Fit

Date	5 July 2026
Team ID	xxxxxx
Project Name	Smart lender
Maximum Marks	5 Marks

Problem-Solution Fit Canvas:

Use the framework below to ensure your proposed solution accurately addresses the root causes, behaviors, and limitations of your target audience. Fill out the canvas in the respective boxes just like the original visual template.

1. CUSTOMER SEGMENT(S) [CS] Who is your customer? 1. people with a bank account 2. Stakeholder & customers 3. People who need loan & people who approve the loan 4. Banker & loan officers	6. CUSTOMER LIMITATIONS EG. BUDGET, DEVICES [CL] Slow process due to manual checking. 1. Complicated Process 2. Plenty of formalities and requirement for documentation 3. Lack of awareness	5. AVAILABLE SOLUTIONS PROS & CONS [AS] Which solution are available to the customers when they face the problem. Or need to get the job done? what have they tried in the past? What pros & cons do these solutions have? I.e. pen and paper is an alternative to digital note taking. 1. Existing loan apps that are available online. 2. Loan agents 3. Online websites to check the credit score of the individual.
--	---	--

2. PROBLEMS / PAINS
+ ITS FREQUENCY [PR]

1. Availability of Data.
2. To predict and provide accurate information.
3. To provide a detailed classification for the customers.
4. Defaulting of the loan.

9. PROBLEM ROOT CAUSE [RC]

1. We need to verify the borrower before sanctioning the loan.
2. Lack of accountability & Failure of models.
3. Individual/Organization's creditworthiness is highly important before sanctioning the loan for them

7. BEHAVIOR
+ ITS INTENSITY [BE]

1. Customer should know about the repayments and choose the plan according to their affordability.
2. Hastens the approval process.

3. TRIGGERS TO ACT [TR]

1. Communication gap between the customers and bank.
2. Borrowers can easily apply for the correct amount by knowing the maximum eligible amount and get their loan approved

10. YOUR SOLUTION [SL]

If you are working on an existing business, write down your current solution first, fill in the canvas, and check how much it fits reality.

1. Using several machine learning models to predict the possibility of loan approval.
2. Automated customer support to help the user and guide them through the process. Users can gain knowledge and apply for loans through the app/portal.
3. various parameters to be collected from the borrowers like their income, personal details and credit score, etc

8. CHANNELS OF BEHAVIOR [CH]

ONLINE:

- apply and track the process online.
- physical interaction can be avoided.
- borrowers can submit proof online and lenders can verify.

OFFLINE:

- Submission of documents in person.
- meet with officers to know about their eligibility.
- To wait in the bank for a long period of time

4. EMOTIONS

BEFORE / AFTER [EM]

1. Before: - Borrowers are doubtful about the process. - Tired and Frustrated
2. After: - Lenders are confident to lend money to borrowers. - Easy & Scalable process.
