

Scalability & Future Plan

Date	5 July 2026
Team ID	XXX
Project Name	Smart Lender
Maximum Marks	1 Mark

Scalability & Future Plan:

This document outlines how the current project solution can be scaled to handle larger user bases, increased data loads, or extended features in the future. It also captures the team's roadmap for enhancing and evolving the project beyond its current state.

Current System Limitations:

S.No	Limitation	Impact	Priority to Address (High / Medium / Low)
1	Limited number of concurrent users	System may slow down during peak usage	High
2	Basic data storage	Difficult to handle large customer and loan records	High
3	Limited security features	Increased risk of unauthorized access	Medium

Scalability Plan:

S.No	Scalability Aspect	Current State	Proposed Upgrade / Solution
1	User Load	Supports a limited number of users	Deploy cloud-based servers with load balancing

2	Data Storage	Local database	Migrate to scalable cloud databases such as MySQL/PostgreSQL on cloud
3	Performance	Single-server architecture	Use caching and optimized database queries
4	Security	Basic login authentication	Add two-factor authentication, encryption, and regular security audits

Future Roadmap:

Phase	Planned Feature Enhancement	Target Timeline	Expected Impact
Phase 2	Mobile application (Android/iOS)	3 months	Better user accessibility
Phase 3	AI-based loan eligibility prediction	6 months	Faster and more accurate loan approvals
Phase 4	Integration with banks and digital payment gateways	9 months	Seamless loan processing
